## FRONT END / FULL STACK WEB DEVELOPER

You are viewing the resume of a talented, passionate, and motivated web developer. Specializing in creating web sites using React, Vanilla ES5/6/7 JavaScript, HTML5 & CSS3, Node.js, Express.js and MongoDB.

## WORK EXPERIENCE

### TWILIGHT CODERS - REMOTE

#### FREELANCE WEB DEVELOPER

##### JULY 2007 - CURRENT

- Working in an Open Source Community, Twilight Coders serves as a home for projects, and cultivates an environment that challenges members and contributors for high standards in quality code.
- Developed React/GraphQL/Relay applications to serve as portfolios for both Twilight Coders proper, as well as the personal site [JimmyVanVeen.com](http://JimmyVanVeen.com) in addition to the projects listed to the right

### DELUXE CORPORATION, GROTON, MA

#### PRODUCTION ARTIST - CUSTOM DEPARTMENT

##### JUNE 2009 - AUGUST 2018

- Conceptualized, created & maintained several HTML/CSS/JS based tools either created from scratch, or extensively maintained independently without external support.
- Successfully developed a suite of program extensions to assist and enhance Deluxe's transition to Adobe InDesign.
- Improved productivity and accuracy of work performed by fellow Design Services employees (a team of 50-60)
- Reduced as many as 7 discrete resources into 1 centralized application, while also creating several new tools from scratch which are indispensable to Deluxe today
- Successfully trained new hires on new job functions, as well as deploying best practices for artwork production using the Adobe Creative Suite, and CorelDraw

### NORCAL WASTE SYSTEMS - SAN FRANCISCO, CA

#### WEB DEVELOPER - INTERN

##### FEBRUARY 2008 - JUNE 2008

- Working with a team of 4-8 individuals, corporate subsidiary websites were updated with fresh content, utilizing standards compliant HTML, CSS, and JavaScript

## SKILLS

- React • ES5/6/7 • HTML5
- CSS3 • Node.JS • MongoDB
- Git • Bootstrap 3/4 • jQuery
- Adobe Creative Suite
- Microsoft Office Suite

## PROJECTS

[Card Game Score Keeper](#) - A front-end only Card Game scorekeeper, used to keep scores of basic card games to avoid needing pen & paper. Created with **React**, **Material UI**, **Bootstrap 4**, and deployed to **GitHub Pages**

[JimmyVanVeen.com](#) - The personal portfolio for Jimmy, created using **React**, **GraphQL/Relay**, **Bootstrap 4**, and deployed using **GitHub Pages**. Note, there is a v1 of this portfolio which was created as a full stack application using **Node.js/Express.js**, **MongoDB**, and deployed to **Heroku**

[freeCodeCamp Work](#) - A collection of projects completed as part of the Free Code Camp curriculum. Projects were completed with **Vanilla ES5/6 JavaScript**, **HTML5**, & **CSS3**
