## JIMMY VAN VEEN

FULL STACK WEB DEVELOPER

---

### ABOUT ME

Jimmy is a passionate full stack web developer, working primarily with Node.js, Express, MongoDB, jQuery, as well as Vanilla CSS, & JavaScript

### SKILLS & ABILITIES

While the primary tools being used revolve around Node.js, MongoDB, and Express, I have experience working with PHP, MySQL, & VBScript among others. In a nutshell, I am passionate to get the job done well using whatever stack fits the bill best.

## EXPERIENCE

### DELUXE CORPORATION, GROTON, MA DESIGN SERVICES – CUSTOM DEPARTMENT JUNE 2009 - CURRENT

The primary function of my role in this position involves working with production art files with tools such as the Adobe Creative Suite, Quark Xpress, and some custom in-house tools.

With my time in Design Services, I spent any free time I could muster to pursue my passion for web development by enhancing, maintaining, and continuously improving several web-based tools our IT department provided us to receive, view, and process artwork from our customers.

Using several technologies such as JavaScript, VBScript, SQL queries, in addition to traditional HTML & CSS, I was able to greatly enhance the accuracy and productivity of our entire team of representatives (which number over 40 individuals). Examples of my work can be found on my website, with corresponding links to the Github & Bitbucket repositories.

### TWILIGHT CODERS – FREELANCE WEB DEVELOPMENT JULY 2007 - CURRENT

Projects that did not pertain to the scope of my day job I performed under the banner for TwilightCoders – a organization name started by my best friend and mentor, Dale Stevens.

Examples of projects include my personal portfolio website JimmyVanVeen.com, Houdana.com, among others. These projects can be found online on my website, as well on Github & Bitbucket.

### NORCAL WASTE SYSTEMS – SAN FRANCISCO, CA WEB DEVELOPER – INTERN FEBRUARY 2008 – JUNE 2008

Primarily working with a team of 4-8 people, responsibilities were to update the content and overall layout of the main website, as well as each subsidiary web site. Tickets were assigned by the project manager, with varying priorities among each request. Once assigned, time management was critical to ensure projects were completed in a timely manner.

## EDUCATION

### UMASS LOWELL – LOWELL MA

I am currently enrolled at UMass Lowell, finishing my last class before obtaining an Associate's Degree in IT. Future plans include pursuing a Bachelor's of Science in Computer Science.
