July 2017 - Present

Southern New Hampshire University

AS - Information Technology

May 2013 - June 2017

UMass Lowell

Objective

- You are viewing the resume of a talented, passionate, and motivated web developer, who specializes in creating web sites using **React**, **Vanilla ES5/6/7 JavaScript**, **HTML5**, **CSS3**, **Node.js**, **Express.js** and **MongoDB**.

Projects

- **Card Game Score Keeper** | **Demo** | **Github**
  A front-end only Card Game scorekeeper, used to keep scores of basic card games to avoid needing pen & paper. Created with **React**, **Material UI**, **Bootstrap 4**, and deployed to **GitHub Pages**

- **JimmyVanVeen.com** | **Demo** | **Github**
  The personal portfolio for Jimmy, created using **React**, **GraphQL/Relay**, **Bootstrap 4**, and deployed using **GitHub Pages**.

- **freeCodeCamp Work** | **Demo** | **Github**
  A collection of projects completed as part of the Free Code Camp curriculum. Projects were completed with **Vanilla ES5/6 JavaScript**, **HTML5**, & **CSS3**

Experience

- **Freelance Web Developer,** Twilight Coders | July 2007 - Current

  - Developed **React/GraphQL/Relay** applications to serve as portfolios for both Twilight Coders proper, as well as the personal site JimmyVanVeen.com in addition to projects listed above

- **Production Artist,** Deluxe Corporation | June 2009 - August 2018
  - Conceptualized, created & maintained several **HTML/CSS/JS** based tools created from scratch
  - Successfully & independently developed a suite of program extensions to assist & enhance Deluxe's transition to **Adobe InDesign**.

- **Web Developer Intern,** Norcal Waste Systems | Feb 2008 - June 2008
  - Working with a team of 4-8 individuals, corporate subsidiary websites were updated with fresh content, utilizing standards compliant **HTML**, **CSS**, and **JavaScript**
